

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	03 October 2026
Team ID	SWTID-2026-7609
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Laptop Request Submission	Submit a request through the Service Catalog form Select the Standard Laptop item Enter required details (requester, quantity, justification)
FR-2	Request Validation	Check that all required fields are filled Check that the request matches standard laptop criteria
FR-3	Approval Routing	Generate an approval for the request Approve or reject the request Continue the flow only after approval
FR-4	Procurement Task Creation	Create a catalog task after approval Assign the task to the Hardware group
FR-5	Notifications and Tracking	Notify the requester when the request status changes Track the request from submission to fulfillment
FR-6	Exception Handling	Route non-standard or invalid requests for manual review

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Employees can order a laptop through a simple catalog form with clear labels and status messages.
NFR-2	Security	Role-based access is used so only approvers can approve and only authorised users can see request data.
NFR-3	Reliability	The flow runs consistently without duplicate tasks or lost requests, and errors can be traced.
NFR-4	Performance	The flow starts soon after a request is placed and creates tasks without noticeable delay.
NFR-5	Availability	The automation is available whenever the ServiceNow instance is available.
NFR-6	Scalability	More standard models, approval rules and request types can be added without redesigning the flow.
