

Project Development Phase

Model Performance Test

Date	03 October 2026
Team ID	SWTID-2026-7609
Project Name	Streamlining IT Procurement Through Standard Laptop Order Automation
Maximum Marks	10 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1	Data Rendered	Procurement requests table (Request ID, requested date, requester, department, location, laptop model, priority, status), Flow Designer run log (flow run ID, trigger time, outcome, approval route, automation flag), and order/fulfillment data (order ID, order date, delivery date, cost).
2	Data Preprocessing	Power Query steps: removed duplicate request IDs, handled blank IDs, standardized status and department names, set date and time data types, and created elapsed-time columns while excluding negative durations.
3	Utilization of Data Filters	Slicers used: Date range, Request status, Department / location, Laptop model, Automation flag (Automated / Manual), Priority / SLA status.
4	DAX Queries Used	Total Requests = DISTINCTCOUNT(Requests[Request ID]) Automated Requests = CALCULATE([Total Requests], Requests[Automation Flag] = TRUE()) Automation Rate = DIVIDE([Automated Requests], [Total Requests]) Approval Hours = DATEDIFF(Requests[Submitted At], Requests[Approved At], HOUR) End-to-End Hours = DATEDIFF(Requests[Submitted At], Requests[Delivered At], HOUR) SLA Compliance % = DIVIDE(CALCULATE(COUNTROWS(Requests), Requests[End-to-End Hours] <= Requests[SLA Target Hours]), COUNTROWS(Requests))
5	Dashboard design	No of Visualizations / Graphs - 6 planned (KPI cards, request trend line, status bar chart, order funnel, SLA gauge, exceptions chart). Update the final count after building the dashboard.
6	Report Design	No of Visualizations / Graphs - 4 report pages planned: Overview, Cycle Time, SLA and Exceptions, Order Details. Update the final count after building the report.
